The Conference **PHYSICS OF MAGNETISM'05** will be the eleventh of the series organized, every three years since 1975, jointly by the Institute of Physics of the Adam Mickiewicz University and the Institute of Molecular Physics of the Polish Academy of Sciences in Poznań. The Conference is meant as an international forum for the presentation and discussion of novel scientific ideas, in a field of broadly understood magnetic phenomena with special emphasis on the following subjects: **novel metallic oxides and magnetoresistive materials** ■ **high temperature superconductors** ■ **low dimensional quantum magnets** ■ **heavy fermions, fluctuating valence and Kondo systems** ■ **spintronics, nanomagnetism and nanostructures** ■ **magnetic semiconductors** ■ **surfaces and multilayers** ■ **electronic structure**.
